Portfolio: abdellatifelfagrouch.me · **GitHub:** github.com/Chidori42

PROFESSIONAL SUMMARY

Full-stack developer and Software Engineering student at 1337 (42 Network). Passionate about building scalable web applications, low-level systems, and integrating AI technologies like LLMs and RAG systems to solve complex data retrieval and automation challenges. Experienced in TypeScript, C++, and DevOps, currently seeking an internship to apply technical problem-solving skills in a professional environment.

EDUCATION

1337 Coding School (42 Network)

Software Engineering (Advanced Program)

Khouribga, Morocco

Nov 2023 — Mar 2026

- Developed deep expertise in C/C++, Algorithms, and Unix System Programming.
- Mastered peer-to-peer learning and rigorous project-based curriculum (100% practical).

Faculty of Law (FSJES)

DEUG in Law

Agadir, Morocco

2020 — 2022

TECHNICAL SKILLS

Languages: JavaScript (TypeScript), C, C++, HTML5, CSS3, SQL, Shell (Bash)
Frameworks/Web: React, Next.js 14, Node.js, Express.js, Fastify, Tailwind CSS
DevOps/Tools: Docker, Docker Compose, Nginx, Git, Linux (Fedora/Ubuntu), Prisma ORM
Databases: MariaDB, MySQL, MongoDB, SQLite, PostgreSQL

SELECTED PROJECTS

Hirefy (ft_transcendence) | Applicant Tracking System

React, Express.js, MySQL, Prisma

- Developed a full-stack platform to streamline recruitment, featuring role-based access for recruiters and candidates.
- Optimized database queries using Prisma ORM, improving data retrieval speeds for applicant filtering.
- Implemented secure authentication and a responsive dashboard for tracking application statuses.

AnimeHub.studio | Full-Stack Community Platform

Next.js 14, Express, Prisma, Docker, AI APIs

- Engineered a containerized platform featuring synchronized watch rooms, live metadata syncing via the Jikan API, and an integrated LLM assistant (Groq/DeepSeek) for personalized recommendations.
- Developed a secure backend architecture using JWT token rotation and orchestrated a digital economy system supporting community auctions and unlockable collectibles.
- Streamlined deployment workflows by configuring Docker Compose and automated Makefile scripts to manage database schema migrations and container orchestration.

IRC Server

C++, Networking (TCP/IP), Socket Programming

- Engineered a fully functional IRC server following the **RFC 2812** protocol from scratch.
- Handled multiple concurrent client connections using non-blocking I/O and `poll()` for high-efficiency multiplexing.
- Implemented core features: private messaging, channel management, and operator commands.

Inception (DevOps)

Docker, Docker Compose, Nginx, WordPress, MariaDB

- Built a localized cloud infrastructure using Docker Compose to orchestrate multiple interconnected containers.
- Configured an Nginx TLS/SSL gateway to secure traffic between services on a dedicated Docker network.
- Automated deployment and volume management to ensure data persistence across system reboots.

RayFlow Engine (Cub3D)

C, Raycasting, Graphics, Math

- Created a 3D game engine using raycasting principles (similar to Wolfenstein 3D).
- Handled complex texture mapping, sprite rendering, and collision detection using low-level graphics libraries.

Personal Portfolio

Next.js, TypeScript, Tailwind CSS, Google Analytics 4

- Built a high-performance portfolio to showcase over 30 projects with optimized SEO and accessibility.
- Integrated Google Analytics 4 using the **react-ga4** library to monitor user engagement and traffic.
